Yidnekachew Kassahun

SOFTWARE QUALITY ASSURANCE ENGINEER

Email | GitHub | LinkedIn | +251913124882 | Addis Ababa, Ethiopia

SUMMARY

Results-driven Software Quality Assurance Engineer and QA Team Lead with 4+ years of experience in manual testing, automated testing, and test case design for web and mobile applications. Proficient in test automation using Playwright API testing with Postman and Rest Assured, and defect tracking with JIRA, TestRail, and Azure DevOps. Skilled in regression testing, functional testing, cross-browser testing, and mobile testing within Agile and Scrum environments. Experienced in leading QA teams, mentoring junior engineers, and collaborating with cross-functional development teams to improve release stability, accelerate bug detection, and enhance software quality across the full SDLC.

SKILLS

- **Testing Tools:** Playwright, Postman, Rest Assured, GitHub Copilot, Claude Code, Chrome Dev Tools
- **Test and Defect Management Tools:** Jira, Google Sheet, Test Link, Trello, Azure DevOps
- **Testing Expertise:** Manual Testing, Automated Testing, Mobile Testing, API Testing, Functional Testing
- **Programming Language:** JavaScript, TypeScript
- **Version Control and CI/CD:** Git, GitHub Actions
- **Professional:** Remote Pair-Programming, Teamwork, Mentoring, Leadership

WORK EXPERIENCE

EAGLELION SYSTEM TECHNOLOGY, *Full Time*
Software Quality Assurance Team Lead | Jun 2025 – Present | Addis Ababa, Ethiopia

- Led a QA team of 17 members on the CBE Super App, assigning test tasks, tracking progress, and ensuring on-time delivery of quality software releases.
- Designed and maintained comprehensive test plans and test strategies for new feature releases, improving software reliability and reducing post-release defects.
- Collaborated cross-functionally with development teams to identify, document, and resolve bugs, accelerating defect resolution cycles.
- Conducted test plan and test case reviews to identify coverage gaps, driving continuous improvement in testing effectiveness and QA processes.
- Mentored and trained junior QA engineers on manual testing, automated testing, debugging techniques, and defect tracking systems, strengthening overall team capability.
- Delivered weekly QA status reports to senior management, communicating project health, test coverage, and release readiness.

ABLAZE LABS, *Full Time*
Software Quality Assurance Engineer | Jun 2024 – Jun 2025 | Addis Ababa, Ethiopia

- Executed manual and automated testing across web and mobile applications to validate software functionality, performance, and reliability.
- Conducted regression testing to verify software stability and prevent defect recurrence following feature updates and releases.

- Designed and executed detailed test cases from functional specifications and requirements documentation, ensuring comprehensive test coverage for new features.
- Identified, documented, and tracked defects using defect tracking systems, streamlining bug triage and accelerating issue resolution.
- Collaborated closely with developers throughout the software development lifecycle (SDLC) to troubleshoot issues, verify fixes, and improve overall product quality.
- Utilized Agile and Scrum methodologies to plan, prioritize, and deliver testing milestones on schedule, supporting sprint goals and release timelines.
- Participated in product design reviews to evaluate functional requirements, identify potential defects early, and provide QA input during the software development lifecycle.

EZRA SEMINARY, *Remote*
Frontend Developer and Manual Tester | Sep 2023 – Sep 2024 | Nairobi, Kenya

- Developed responsive, user-friendly web interfaces for educational platforms using HTML, CSS, and JavaScript.
- Collaborated with backend developers to integrate APIs, improving application functionality, performance, and user experience.
- Designed responsive layouts ensuring cross-browser and cross-device compatibility across desktop and mobile platforms.
- Executed manual test cases to identify and document software defects, contributing to higher quality releases for educational applications.
- Debugged existing code, identifying and resolving bugs to improve system performance and application stability.
- Participated in daily standup meetings with project stakeholders to communicate progress, blockers, and priorities.

MICROVERSE, *Remote*
Full Stack Web Development Trainee | Sep 2022 – Sep 2023 | California, United State of America

- Developed responsive web applications using HTML, CSS, and JavaScript, applying full-stack development principles.
- Collaborated with cross-functional teams to clarify project requirements, align on deliverables, and support project milestones.
- Conducted code reviews to enhance code quality, maintainability, and adherence to coding standards and best practices.
- Participated in daily standups to share progress updates, discuss blockers, and collaborate on problem-solving.
- Engaged in remote pair programming to strengthen collaborative coding practices and knowledge sharing.

EDUCATION AND TRAINING

MICROVERSE
Remote Full Stack Web Development
Sep 2022 – Sep 2023
San Francisco, California, United States

UNIVERSITY OF GONDAR
Mechanical Engineering BSc. Degree
Sep 2015 – Feb 2021
Gondar, Ethiopia

PROJECTS

- DASHIN BANK SUPER APP
- STAR PAY PAYMENT GATEWAY
- CBE CONNECT
- ELHARDAR ENGINEERING
- MED QUIZ
- EZRA SEMINARY

CERTIFICATION AND LICENSES

- HTML/CSS Module - Microverse, Issued Feb 2023
- JAVASCRIPT Module - Microverse, Issued Mar 2023
- REACT/REDUX Module - Microverse, Issued Apr 2023
- JAVASCRIPT ALGORITHMS AND DATA STRUCTURES - freeCodeCamp, Issued Aug 2023
- DATABASE Module - Microverse, Issued May 2023
- PLAYWRIGHT - Test Automation University, Issued Oct 2024
