Yidnekachew Kassahun

Software QA Engineer | QA Team Lead

Addis Ababa, Ethiopia | +251 913 124 882 | Yidnekachew.kassahun.qa@gmail.com

Portfolio: yidne-portfolio.onrender.com | linkedin.com/in/yidnekachew-kassahun | github.com/Yidnekachew-cmd

SUMMARY

QA Team Lead with 3+ years in software quality, currently leading a 17-person QA team testing a pre-launch mobile super app for one of Ethiopia's largest banks, with a regression cycle of 10,000+ test cases across 5 suites. Has tested banking, payments and education products on web, Android and iOS, using Playwright automation and Postman API testing. Built the team's QA dashboard with Claude Code and a test case template the whole team uses. Currently learning Claude Code for test automation and Rest Assured for API automation, with the goal of becoming an AI-powered automation engineer.

SKILLS

- **Test automation:** Playwright, JavaScript, TypeScript, Page Object Model, Cucumber (BDD)
- **API testing:** Postman, REST APIs
- **Testing:** Functional, regression, smoke, end-to-end, cross-browser, mobile (Android and iOS)
- **Test management:** Jira, Azure DevOps, TestLink, Google Sheets, Trello
- **Leadership and process:** Test planning and strategy, test case reviews, mentoring, QA reporting, Agile/Scrum
- **Dev and tools:** Git, GitHub, GitHub Actions, Chrome DevTools, GitHub Copilot, HTML/CSS, React
- **Currently learning:** Claude Code for test automation, Rest Assured for API automation

EXPERIENCE

Software QA Team Lead | EagleLion System Technology, Addis Ababa — Jun 2025 - Present

- Lead a 17-person QA team testing a pre-launch mobile super app for one of Ethiopia's largest banks: a regression cycle of 10,000+ test cases across 5 suites (mobile app, backend services, e-commerce and USSD), 90% executed with a 97% pass rate.
- Built a QA dashboard with Claude Code that tracks 10,000+ test cases live, bringing the team's test progress, failed cases, bugs and reports into one place.
- Created a test case sheet template that the whole QA team now uses, so cases are written, executed and reported the same way.
- Write test plans and strategies for new features, and review test plans and test cases to close coverage gaps.
- Run mobile testing on Android and iOS for functionality, performance and UI consistency.
- Mentor junior QA engineers in manual and automated testing, debugging and defect reporting.
- Report weekly to senior management on test coverage, open defects and release readiness.

Software QA Engineer | Ablaze Labs, Addis Ababa — Jun 2024 - Jun 2025

- Ran manual and automated testing on web and mobile applications, including Playwright automation for regression and end-to-end flows.
- Designed and executed test cases from requirements, and ran regression testing after every release.
- Logged and tracked defects with developers from report to verified fix.
- Planned and delivered testing within Agile/Scrum sprints.
- Joined design reviews to give QA input before development started.

Frontend Developer and Manual Tester | Ezra Seminary, Remote — Sep 2023 - Sep 2024

- Built responsive pages for an online learning platform with HTML, CSS and JavaScript, and integrated backend APIs.
- Ran manual tests across browsers and devices, and debugged and fixed bugs before release.
- Finalized and handed over the project remotely during my first months at Ablaze Labs (Jun to Sep 2024).

SELECTED PROJECTS

- **Banking Super App** (mobile banking, under NDA) - Leading QA for a major Ethiopian bank's upcoming super app: 10,000+ test cases across mobile, backend, e-commerce and USSD suites, 97% pass rate, Android and iOS testing and launch readiness.
- **QA Dashboard** (internal tool, built with Claude Code) - One place for the QA team's work: test progress from the teams' Google Sheets, failed cases, a bug tracker, QA KPIs and PDF/Word reports. Next.js, TypeScript, Cucumber.
- **Test Case Sheet Template** (team process) - Shared template the whole QA team uses to write, execute and report test cases.
- **Dashen Bank Super App** (mobile banking) - Regression and end-to-end testing with Playwright automation. dashensuperapp.com
- **Star Pay Payment Gateway** (fintech) - Manual, regression and end-to-end testing of transaction flows. starpayethiopia.com
- **CBE Connect** (diaspora wallet app) - Regression testing across releases. Google Play
- **Med Quiz** (education) - Test cases plus smoke, regression, end-to-end and API testing from project start.
- **El-Hadar Engineering** (web) - Test cases plus smoke, regression and end-to-end testing from project start. elhadar.com
- **Ezra Seminary** (education) - Frontend development and manual testing. ezraseminary.org

EDUCATION

- **BSc, Mechanical Engineering** - University of Gondar, Ethiopia | 2015 - 2021
- **Full-Stack Web Development Program** - Microverse (remote) | Sep 2022 - Sep 2023. Full-time remote training with code reviews and pair programming.

CERTIFICATIONS

- **Playwright** - Test Automation University, Oct 2024
- **JavaScript Algorithms and Data Structures** - freeCodeCamp, Aug 2023
- **Microverse modules:** HTML/CSS, JavaScript, React/Redux, Databases - Feb to May 2023
